**Top view**

**Side view (wheels and chassis only)**

Schematic, not to every detail; dimensions in mm.
$l_y = (199.4 - 30.4)/2 = 84.5$ (center of the wheel width), $l_x + l_y = 164.5$.
Overall length with antennas: 300; height to the top of the lidar: 204.62.
In the simulator the wheels are plain cylinders; the mecanum motion comes from Eq. 1.
